

MAHABUB AHMED

Cloud & DevOps Engineer | Heilbronn, Germany

ahmed.mahabub.063@gmail.com • +4915215137473 • [LinkedIn](#) • [GitHub](#) • [Portfolio](#)

Cloud and DevOps-focused Software Engineer with hands-on experience in AWS, Kubernetes, Terraform, Docker, CI/CD automation, and backend development. Currently working remotely as a Software Engineering Intern contributing to deployment automation and production support. Seeking Cloud, DevOps, or Platform Engineering opportunities.

TECHNICAL SKILLS

Cloud & Infrastructure: AWS (EC2, S3, IAM, RDS, EKS, ECR, VPC), Terraform, Linux

Containerization & Orchestration: Docker, K8s (kind, kubeadm, EKS), Helm, Docker Compose, Calico (CNI)

CI/CD & Automation: GitHub Actions, Jenkins, Bash, SonarQube, Trivy

Networking & Security: VPC, Security Groups, AWS ALB, Nginx, TLS/SSL, DNS, HTTP/HTTPS

Monitoring & Observability: Prometheus, Grafana, ELK Stack

Programming: Python, Go, TypeScript, JavaScript, C, C++

Backend & Databases: FastAPI, Node.js, REST API Design, PostgreSQL, MySQL, MongoDB

EXPERIENCE

Software Engineering Intern | PixScrib (Gaming Platform Startup), Remote | Apr 2026 – Present

- Developed backend features, resolved production issues, and contributed to platform maintenance.
- Implemented GitHub webhook integrations for automated development and deployment workflows.
- Automated deployment workflows, improving release consistency and reducing manual effort.
- Supported monitoring, troubleshooting, and production operations to improve reliability.

Assistant Engineer | Vicar Electricals Ltd, Bangladesh | Mar 2018 – May 2020

- Improved QC processes, reducing defects through troubleshooting and process optimization.
- Worked in team-based industrial environments, strengthening collaboration and execution discipline.

PROJECTS

DevOps Circle — GitOps-Delivered Microservices Platform

[GitHub](#)

React · FastAPI · PostgreSQL · Redis · Docker · GitHub Actions · Trivy · Terraform · AWS · k3s · Kustomize · ArgoCD · Prometheus · Grafana · Loki

- Deployed 8 microservices to AWS on Terraform-provisioned infrastructure, with ArgoCD GitOps making every release traceable to its exact commit SHA.
- Built a fully automated 6-stage GitHub Actions pipeline (test → scan → build → deploy → verify) that takes code from push to a running cluster with zero manual steps.
- Gated every merge with Trivy vulnerability scans and pytest contract tests, so broken or insecure images never reach production.
- Delivered real-time observability with Prometheus, Grafana, and Loki 21 live scrape targets tracking latency, throughput, and Redis queue depth.

Cloud-Native Application Deployment Platform

[GitHub](#)

Angular · FastAPI · PostgreSQL · Kubernetes · Helm · Docker · GitHub Actions · Terraform · AWS

- Provisioned AWS infrastructure (EKS, RDS, IAM, ECR, VPC, ALB) with reusable Terraform modules and deployed containerized Angular/FastAPI services via Kubernetes and Helm for reproducible, environment-specific releases.
- Automated CI/CD pipelines with GitHub Actions for build, test, and deployment, and configured Nginx as a reverse proxy with TLS/SSL termination for secure routing.
- Implemented Prometheus and Grafana dashboards for real-time infrastructure and service monitoring.

EDUCATION

42 Heilbronn gGmbH, Germany — Software Engineering Program | Oct 2024 – Present

Ahsanullah University of Science and Technology (AUST), Bangladesh — B.Sc. in EEE | May 2017

LANGUAGES

English (Fluent) • German (B1 – Learning) • Bengali (Native)
